Violation Detail(s): Failure to institute/maintain safety equipment measures or temporary construction No vertical safety netting. During inspection of a proposed 12 story building at 10 stories, I observed that there was missing vertical netting throughout the entire site and stair wells. The lack/missing netting created areas where material and tools could fall over the side down to the levels below. This creates a hazardous situation of being struck by items when working. Remedy: Install vertical safety netting as required Stop all perimeter work from the 2nd story to all upper floors and stay 10 feet back from the leading edge. Provide, vertical netting as per code. Contact CSE for reinspection.
